POLYRESIN
SHUTTERS

Everyday Perfection

Vogue Polyresin shutters feature revolutionary technology for a premium painted look shutter with superior strength and durability.

Bringing elegance to any interior with a soft matte lustre reminiscent of freshly painted wood, Polyresin shutters will always look as luxurious as the day they were installed.

Proudly Made in Australia, Polyresin shutters come with a 20 Year Warranty* for peace of mind.

Tailor Made Solutions

Vogue Polyresin shutters are available in three louvre sizes and tilt options that combine a fashionable, clean look with superior durability.

64mm

89mm

114mm

Tilt Options

Perfect for privacy, light control or creating the finishing touch to your home, Polyresin shutters are available in three operating options.

SmartView® Operating System

Is a patented gear-driven system for one-touch control and an unobstructed view. This system completely eliminates the traditional rear or front tilt bar.

ClearView Tilt Control

Features a tilt bar located on the window side of the louvre for an unobstructed view.

Tilt Bar Operation

Offers a traditional look that can close in both directions, unlike many shutters which are one-directional only. Our patented tilt bar has eliminated unsightly gears or staples which tend to rust or break.

Tracks & Valances

Polyresin shutters can not only be used as a window covering but can be used as a room divider. A variety of styles, tracks and valances are available depending on the application.

Hinged & Bi-fold Shutters

Shutters can be designed with one or more shutter panels hinged in a variety of configurations including individual panels or two panels in a bi-fold design. The bi-fold track system allows up to eight panels to be hinged together connected by a top and bottom track.

Triple By-Pass System

Allows for a three panel configuration, which is ideal for sliding doors providing ultimate privacy whilst maintaining a great view through.

Open By-Pass System

Allows you to leave your louvres open and still slide the panels across each other while maintaining full view through.

Valance Options

Available to enhance and complete the look of our By-Pass and Bi-Fold shutters, with a sleek and simplified design for a contemporary look.

These valances incorporate a new corner key and clip assembly which result in a clean finish and easy installation.

- Crown Valance (Bi-fold and By-pass)
- Bi-fold Standard Valance
- By-pass Standard Valance

Bullnose Z Frame

Frame Options

Customise the look of your Polyresin shutter with the right frame to suit your style and window application.

The Bullnose Z frame is ideal for reveal installations. Featuring rounded edges with a modern style providing a clean and simple look that blends into any home. Excellent for slightly out-of-square windows as the extended flange will hide any imperfections.

Other frame options include: Z Frame, Trim Frame, Deluxe Trim Frame and L Frame.

Specialty Shapes

Not all windows are square. Specialty shapes are available to fit a number of window shapes and are a perfect way to add curve appeal to your windows.

Available in Elliptical, Eyebrow, Half-Circle, Quarter-Circle and Tunnel shapes, shutters are custom made to match the horizontal louvre design creating a uniform look from top to bottom.

Specialty shapes control options include Patented Tilt-Bar or ClearView Tilt Control.

All shapes are custom made to order and imported. Longer lead times apply.

No hazards from cords

Lightweight design

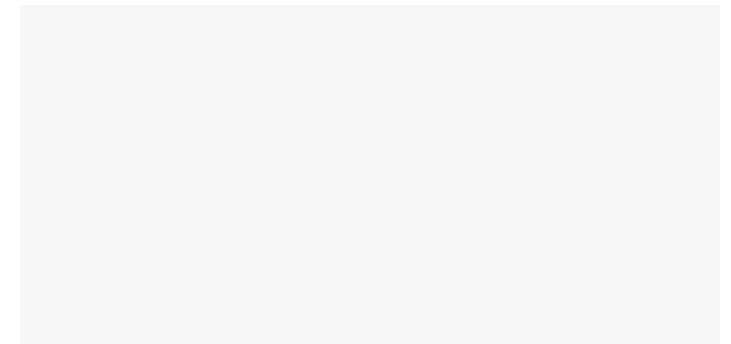

Little or no maintenance

20 Year Warranty*

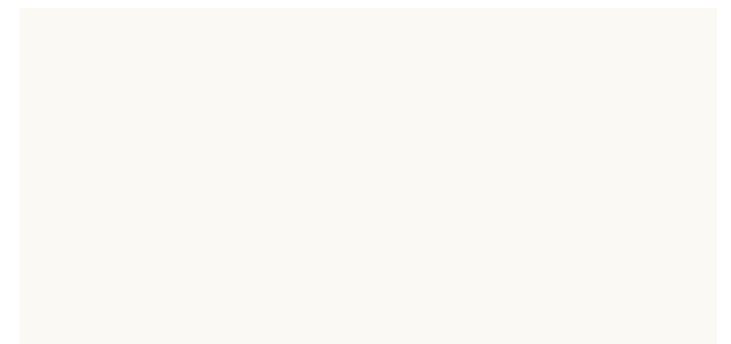

Peace of Mind

Colour Range

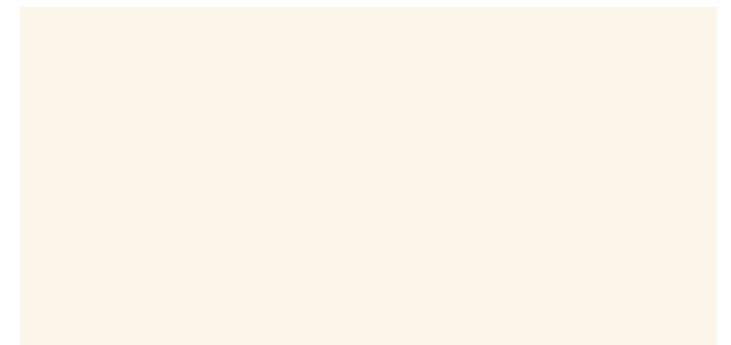

The Polyresin finish is available in three classic shades to complement any decor.

White

Pearl

Vanilla

Healthy Indoor Air

Vogue Polyresin shutters are made from a unique polyresin compound with UV inhibitors to ensure superior performance and longevity in the harsh Australian sun.

The safe and sustainable choice, Vogue polyresin shutters are environmentally friendly and safe for your home. Our Polyresin shutters are made from completely non-toxic materials and do not allow harmful mold or mildew to adhere to the shutter.

Polyresin shutters have been tested and are Greenguard® Gold certified to meet strict certification criteria for low Volatile Organic Compound (VOC) emissions and are acceptable for use in environments such as schools and healthcare facilities (IEQ-11).

Care & Cleaning

Maintenance of Polyresin shutters is a breeze. Simply wipe down shutters with a soft damp cloth to keep them looking clean.

Unsightly blemishes can be removed with a little bit of soap and water.

For a deep clean shutter, panels are easily detached from the window and can be hosed clean if necessary.
